

WEEKLY REPORT

Work done in last Two week:

- Definition Analysis.
- Studied Python.
- Analyze Research of other Researchers.
- Initially, we tried to find out the problem statement which we could overcome with our innovation.
- The problem statement which we came up to was quite evident in real world scenario and thus for that we came up to the unique and best solution of it.
- Although being quite evident, this problem is not so much noticed and we also have to explore a lot to see if there any pre-existing solution available or not.

Plans for next Two week:

- Explored Kaggle for current projects.
- We are planning to discuss this project with our internal guide.
- Also, the technologies required to build this project has to be discussed.
